

Metal Band Oil Filter Wrench 65 - 105mm

This metal band oil filter wrench is easy to adjust and is designed to clamp firmly onto any cylindrical object without damage, ideal for the removal and fitment of old style oil filters. The curved foot profile clamps securely on to the filter for a firm grip and the knurled knob gives fine adjustment control. The slim profile of the metal band filter wrench means it is easy to use even in very tight spaces. A robust tool with a spring steel clamp and aluminium parts for lightweight durability.

Additional Information
