

Magnifying Glass with Magnet

Magnifying glass with 210mm long flexible shaft and a magnetic base. The 95mm diameter lens offers 3x magnification and the strong magnet can be attached to any ferrous metal surface for convenient hands-free magnification, ideal for precision work. The multiple ball joint shaft design allows the magnifier to be positioned at the best angle. A useful tool for any close-up inspection or precision task.

Additional Information

- Magnifying glass with flexible shaft & strong magnetic base.
- Magnification 3 x (300%).
- Lens size: 95mm diameter.
- Flexible shaft length 210mm.
- Ideal for precision work, inspection, reading chassis numbers etc.
