

Tyre Valve Tool Set 3pc

Used to remove and replace leaking rubber body tyre valves without removing the tyre.

Additional Information

- Kit contains a valve hook tool, screw tool, and tapered tube.
- The hook is used to remove the old valve body, the screw tool and tapered tube are used for fitting. Lubricate with tyre lube or similar.
- Ideal for replacing leaking valves on cars, vans, motorcycles etc.
- Ideal for use when it isn't straightforward to remove and refit tyres, such as those on motorcycles or agricultural vehicles.
- Not suitable for tyres with TPMS.
