

Set de vidange complet - 5 pcs

Essential service tool kit for hassle free oil change. The kit includes a generous 6 litre capacity oil drain pan made from tough polypropylene. An oil absorbing mat (500mm x 400mm) that will absorb oil, brake fluid and other petroleum-based fluids but repels water-based fluids and keeps the garage floor (or driveway) tidy, plus a hazardous waste bag and cable ties to dispose of the mat when you're finished. And finally the 140mm diameter funnel is essential to make sure you don't spill oil on your clean engine.
