

Spark Plug Socket 3/8"D 14mm

A 14mm Bi- Hex (12pt) 3/8" drive spark plug socket with longer length barrel, narrow walls and ball joint head designed to fit the narrow spark plug recesses commonly found in modern vehicles. The wobble function is particularly useful for accessing BMW spark plugs which are installed at an angle of $> 5^\circ$, where a standard spark plug wrench does not fit. This professional quality tool is manufactured from chrome vanadium and has an internal spring clip for reliable spark plug removal and installation.

Additional Information

- Applications include: BMW vehicles: 1 Series (E81, E87-N43B), 3 Series (E90-N43B), 5 Series (E60-N43B).
- Size: 14mm Bi-Hex (12pt) x 3/8"D x 92mm.
- Outside diameter: 18.88mm; inside depth: 48.75mm.
- Wobble function & longer length for improved access, ideal for the $> 5^\circ$ angled spark plugs found on BMW engines. Fitted with rubber insert to protect and hold the spark plug.
- Manufactured from chrome vanadium.
