

Offset Star Wrench 1/2"D E14 - for Mercedes-Benz M651

Offset E14 Star* wrench 1/2"D, designed to give improved access to the camshaft fixing bolts on the Mercedes-Benz M651 engines.

Additional Information

- Designed to give improved access to the camshaft fixing bolts on the Mercedes Benz M651 engines.
- The M651 engines have their cam chains mounted at the back of the engine which can make the access to the L/H threaded cam sprocket fixing bolts difficult with standard E14 spanners.
- Especially useful on the Mercedes-Benz Sprinter, where the cam pulley access is restricted.
- Recommended when replacing the cam chain on the M651 Mercedes-Benz engines.
- Use with Laser Part No. 6651 Timing Chain Fitting Bridge & Laser Part No. 6297 M651 timing tool kits.
