

Schlauchklemmenschneider für Gelenkmanschetten

The CV boot hose clamp cutters are designed for the safe removal of hose clamps without damaging the CV boot. The cutter head is angled at 45° for improved access and the compact hardened steel cutting jaws have a lift and cut action for accurate results. Long reach, angled handles give plenty of leverage for a powerful cutting action. The tool is spring loaded to deliver a precise, controlled cut and the handles are plastic dipped for grip and comfort. Part of a range of specialist tools designed for CV boot maintenance.
