

## Fuel & Additive Funnel - Diesel

A fuel and additive funnel for use on diesel vehicles fitted with anti-misfuelling flaps, with a long neck design that opens the internal flap to allow emergency refuel. The funnel is manufactured from tough polypropylene and there is a notch in the rim designed to fit fuel additive bottles for easier filling. A useful funnel to keep in the car in case of emergencies.

### Additional Information

- Outlet diameter: 24.5mm. For diesel fuel fillers only.
- For emergency fuelling or adding fuel additive.
- Manufactured from polypropylene plastic (PP).
- Angled, notched, anti-splash rim for easier filling. Total funnel length 165mm.
- Fuel & additive funnel available for petrol. Please see Laser Part No. 8020.
