

LTR Steel Floor Pump

Easy to use track pump suitable for both road and mountain bikes tyres. It features a switchable valve head, so that it can fit both Presta (high pressure) and Schrader (car type) valves, with a thumb lock to keep it in place and prevent any air escaping whilst in use. More efficient than a hand pump, and more stable than a foot pump, this is ideal for use both at home and in the workshop.

Additional Information

- Floor pump for inflating bicycle tyres.
- Fits both Presta & Schrader valves.
- Ergonomic plastic handle.
- Hose length: 700mm.
- Height: 540mm (approx 21").
